Kitchener, Ontario, Canada

SUMMARY

Security-focused Software Developer with hands-on experience in cybersecurity assessments, SOC-style triage, networking, and virtualized enterprise environments. Skilled in Linux, Windows/AD, incident investigation, log analysis, and vulnerability assessment. Built realistic cyber labs using pfSense, Windows Server, and Kali Linux, performing hardening, routing troubleshooting, and attack simulation. Strong communicator with experience documenting security reports and applying playbooks.

PROJECTS

- Vibe — AI-Powered Full-Stack Website Generator** Live Demo
Full-Stack Developer | Next.js, TypeScript, tRPC, Prisma, Inngest, E2B
 - Built a full-stack AI-integrated platform that generates complete Next.js websites in seconds using autonomous background workflows.
 - Implemented sandboxed execution using E2B, enabling secure, isolated code generation and runtime previews.
 - Designed event-driven background jobs with Inngest AI Dev Kit to orchestrate long-running AI tasks and parallel execution.
 - Developed a type-safe API layer using tRPC, ensuring end-to-end type safety between client and server.
 - Integrated Clerk for authentication and protected routes.
 - Managed relational data using Prisma ORM with PostgreSQL (Neon).
 - Built entirely in Next.js and deployed on Vercel.
- AI ResumeAnalyzer** 2025
Full Stack Developer | React, Node.js, Express, MongoDB, OpenAI API
 - Developed an AI-powered web app where users upload resumes or select from saved versions.
 - Implemented AI-driven scoring and feedback based on job role and description.
 - Designed an intuitive dashboard for resume insights and improvement suggestions.
 - Focused on clean API design, responsive UI/UX, and seamless file handling.
- RoomDetection and Virtual Flooring System (LangGraph + Hugging Face)** 2025
AI Developer | Python, PyTorch, Hugging Face, LangGraph, OpenCV
 - Developed a vision-based application that automatically detects room boundaries from uploaded images using pretrained Hugging Face segmentation models.
 - Integrated LangGraph to orchestrate multi-step AI reasoning, enhancing detection reliability and context flow.
 - Focused on AI workflow automation, model integration, and computer vision for real-world simulation.
- WindowsGameServer Service Deployment** 2025
Developer | Technologies: C#, .NET
 - Developed a Microsoft Windows service for hosting a word game server.
 - Deployed the service on Azure VM, ensuring uptime and scalability.

TECHNICAL SKILLS

- Cybersecurity & SOC Skills** : SIEM Concepts, Log Analysis, MITRE ATT&CK, Packet Analysis (Wireshark), Vulnerability Scanning (Nmap), Endpoint Troubleshooting, Firewall Rule Analysis
- Networking**: TCP/IP, Routing, DHCP, VPN, pfSense Configuration
- Programming Languages** : Python, JavaScript, C/C++, C# (.NET), Java, PHP
- Frameworks & Libraries** : React, Node.js, Express, PyTorch, Hugging Face Transformers, Scikit-learn, LangGraph
- Data & Analytics** : Pandas, NumPy, Matplotlib, SQL, MongoDB, Data Visualization, AI/ML Modeling
- System & OS** : Linux , Bash/Shell Scripting, Windows
- Tools & Platforms** : Docker, Git, GitHub
- Concepts** : Machine Learning, Computer Vision, Data Structures & Algorithms, Cybersecurity, Cloud AI Deployment

EDUCATION

- Conestoga College** January 2024 - April 2025
Diploma - Software Engineering Technician

PROFESSIONAL DEVELOPMENT (ACHIEVEMENTS)

- The Complete Hands-On Cybersecurity Analyst Course**
Udemy Online Course
- The Complete JavaScript Course 2025: From Zero to Expert!**
Instructor: Jonas Schmedtmann
- 100 Days of Code: The Complete Python Pro Bootcamp**
Instructor: Dr. Angela Yu
